Date of this summary and plan document: July 28, 2020

1) Summary of feedback and tasks to do

○ For all the Pages:

- Development and testing on the deployment server
- Identical and fixed navbar
- Similar CSS
- focus on P1

○ Home

- Bigger logo
- Clickable card image
- Blue information section shall be on the top of the page
- Move sort button down to “total results found”
- Filter buttons are not clear, and they shall remain the same height
- Delete the heart and share icons
- Click the card will present more info
- Expand message icon to the “contact to landlord” button

c) Listing

- New page
- Keep the pattern and color as same as home page

d) Message pop-up

- Bold “Thank you for your”
- Add text box: Date
- Pre-fill name, email, and date
- Add X and delete Close button
- Common CSS

e) Posting

- Put in one column
- Put the upload image button in the end.
- Mark the mandatory field.
- Switch the order of Submit and Reset, bigger space

f) Dashboard

- Show the total number of messages
- Make scroll-down function
- Add date and time

g) Workbench

- Users: Encrypt password
- User message send: Date, property ID, User ID

h) Github

- One single development branch and feature branches
- Descriptive comments e.g., adding script for search

i) ~~Login / Sign up (not reviewed by prof)~~

2) List of tasks the team chose to focus on and implement for final delivery

- Guest users
 - will be able to search by zip code, city, property description and filter by home type, rent/buy, and pets allow
 - have the ability to view a listing
 - have the ability to register
- Member users
 - have the ability to securely login
 - have a viewable Dashboard page where they can manage listings they created and view messages they have received
 - with a verified SFSU email address (SFSU Users), specifically buyers or renters can message the landlord with contact info.
 - have the ability to submit created listings for approval
- Administrator
 - will be able to review posting
 - will be able to delete malicious or irrelevant posting
 - will be able to delete malicious message

3) List of final product P1 functions agreed at the meeting (repeat even if same as default recommended by Prof. Petkovic) (1 page max)

- 1) Guest users
- will be able to search by zip code, city and filter by home type, rent/buy, and pets allow
 - have the ability to view a listing
 - have the ability to register

2) Member users

- have the ability to securely login
- have a viewable Dashboard page where they can manage listings they created and view messages they have received
- with a verified SFSU email address (SFSU Users), specifically buyers or renters can message the landlord with contact info.
- have the ability to submit created listings for approval

3) Administrator

- will be able to review posting
- will be able to delete malicious or irrelevant posting
- will be able to delete malicious message
